

Bring your hearing
to life with Bernafon

Bernafon

Live your life in clear
and natural sound

When you're talking to loved ones, enjoying a favourite song, or relaxing to the sounds of nature, brilliant hearing means hearing all the details as they truly are. The clear and natural sound from Bernafon hearing aids will help you feel connected to the people you care about and the moments that matter.

Our hearing aids make people's voices distinct even if they're speaking softly, so you can enjoy great conversations. At the same time, they'll help you remain comfortably aware of other sounds and where they're coming from.

This is because Bernafon hearing aids amplify sound unlike any other hearing aid does. They follow the natural pattern of real sound, so you get clear and natural-sounding speech and comfortable listening in noisy environments.

Hear them clearly, even through the noise

Enjoying life on the go means navigating noisy environments like train stations and crowded get-togethers where many different sounds compete for your attention.

Whether you're inside a café or talking to someone on a busy street, Bernafon hearing aids will help you focus on what matters to you – like the person you're talking to – so you can immerse yourself in conversations even in noisy places.

Our Smart Directionality and Smart Noise Management technologies adjust to your environment, so you get better sound quality and even clearer speech understanding in noisy places. Our unique Smart Sensor*, uses motion detection to know when you want to focus on one person or many, so you can easily be part of conversations with several people.

* Available in Encanta 300 and 400 hearing aids.

Engineered for reliability you can trust

When you get hearing aids, you need to be sure they'll keep working reliably, day in and day out.

At Bernafon, we build our hearing aids to be robust. We rigorously test them to ensure they'll withstand heat and cold, water and dust, and knocks, drops, and bumps.

As part of the Demant Group, Bernafon is backed by one of the hearing care industry's strongest research and development teams. We bring decades of experience to perfecting every speaker and push-button, ensuring it'll function reliably for many years to come. What's more, Bernafon hearing aids are designed in Denmark and primarily produced in Europe, at state-of-the-art facilities dedicated to exceeding the highest standards.

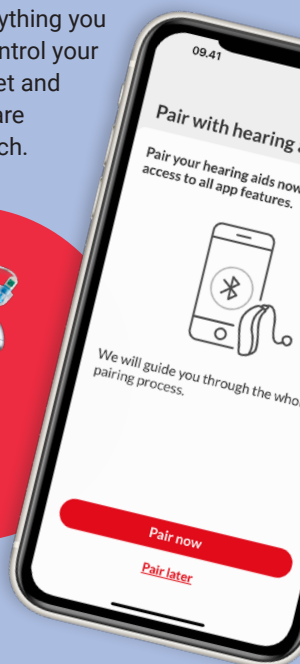

Connect to life with confidence

In a typical day, you might talk on the phone, listen to music, or watch TV. So why not hear them directly and comfortably in your hearing aids?

You can use Bernafon hearing aids as a wireless headset that easily connects to your phone and other devices. Then you can have hands-free phone calls, listen to your favourite music directly through your hearing aids, have video meetings, and stream audio from your TV at your own volume level* – all with comfort and ease.

What's more, with our easy-to-use phone app, you'll have everything you need to make the most of your hearing. You can discreetly control your hearing aids, personalise your sound, find lost hearing aids, set and achieve hearing goals, and even get help from your hearing care professional – all from your smartphone, tablet, or Apple Watch.

Experience music unlike any other hearing aid

Music enriches life in so many ways, whether you're a musician, a music lover, or a casual listener.

With the unique Bernafon Music Experience program in Bernafon hearing aids*, all your music will come alive whether it's live, recorded, or streamed.

Our unique music algorithm gives highly accurate sound reproduction that preserves the precision and tonality of music for a fuller sound experience. With high-quality, precise, and balanced sound, you'll be able to enjoy high notes and deep bass alike – whether you're playing an instrument yourself or following the melodies from your favourite chair.

*Available in Bernafon Encanta, Alpha XT, and selected Alpha and Entra hearing aids.

The Bernafon Sound Experience

At Bernafon, we make it our job to empower the work of hearing care professionals. To help them deliver excellent care, on their terms. Because we know that expertise matters. Professional care is the key that turns extraordinary technology into personal solutions. Solutions that help people with hearing loss live life the way they want to.

As part of the Demant Group, with over a century of experience and know-how, Bernafon benefits from one of the world's strongest research and development teams within hearing healthcare. We bring this expertise and dedication to hearing care professionals – so they can provide an exceptional sound experience.
